Welbeck Fabrics Limited are a well known and respected company in the fabric industry. They supply knitted fabrics World Wide, mainly in North America and the Far East besides being a major player in the Home Market supplying many High Street names.

Bill Hallett is the Development Manager of Welbeck Fabrics Limited, and is responsible for the development, product viability and costing of new products.

Bill explains that Welbeck needed control in the presentation of Product Specifications, Costings and Data Analysis and several years ago, researched the market for a software solution that would address their needs. There were few solutions that addressed their requirements natively on a Unix platform, but discovered the NRG Report Writer and found that it gave them everything they were looking for.

Welbeck have a 24 user system that allows them to run the NRG reporting processes in a client/server environment using Windows clients and a SCO server.

Welbeck Fabrics Limited have used the NRG Report Writer since around 1996 and make use of it in many areas including Sales, Production and particularly in the R&D section.

Bill says, *"We needed control in the presentation of Product Specifications, Costings and Data Analysis and this software met all our needs. Backed by a splendid Help Desk and Technical Support we are happy to continue using this product."*
